DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to a system for externally identifying a particular callee, classified in **class 379, subclass 88.02**.
 - II. Claims 17-31, drawn to a system for specifying telephone services for a particular callee, classified in **class 379, subclass 201.02**.
 - III. Claims 32-59, drawn to a system for informing a caller of a callee identity, classified in **class 379, subclass 207.14**.
2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.
 - In the instant case, invention I has separate utility than inventions II and III, such as the invention associated with a system for externally identifying a particular callee, wherein a voice utterance for a callee is received and the callee identity is identified in association with the voice utterance.
 - Invention II has separate utility than inventions I and III, such as the invention associated with a system for specifying telephone services for a particular callee, wherein services are specified according to an authenticated callee identity according to a callee profile.
 - Invention III has separate utility than inventions I and II, such as the invention associated with a system for informing a caller of a callee

Art Unit: 2645

identity, wherein an authenticated callee identity is transferred to an origin device in order for the calling party to be informed of the party answering the call.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for each invention is not required for the other, restriction for examination purposes as indicated is proper. See MPEP § 806.05(d).

4. A telephone call was made to Applicants' representative, Artoush Ohanian (Reg. No. 46,022), on November 19, 2004, to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 C.F.R. 1.48(b) and by the fee required under 37 C.F.R. 1.17(i).

7. A shortened statutory period for response to this action is set to **expire 0 (zero) months and 30 (thirty) days** from the mail date of this letter. Failure to respond within

Art Unit: 2645

the period for response will result in **ABANDONMENT** of the applicant (see 35 U.S.C 133, MPEP 710.02, 710.02 (b)).
